Sources, by Origin.....19.....30

PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the Island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also outshipments from the State. Several items of minor importance are excluded and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; fluid milk production data are from farms with herds of 10 or more head; marketings of beef and swine products are from total slaughter figures. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the U. S. Mainland as well as unloads from the outer islands; and therefore, does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighbor islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies.

ACKNOWLEDGEMENT

The Federal-State Market News work was made possible through the cooperation of the Consumer and Marketing Service, United States Department of Agriculture, and the Hawaii State Department of Agriculture. The Department of Agriculture gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers.

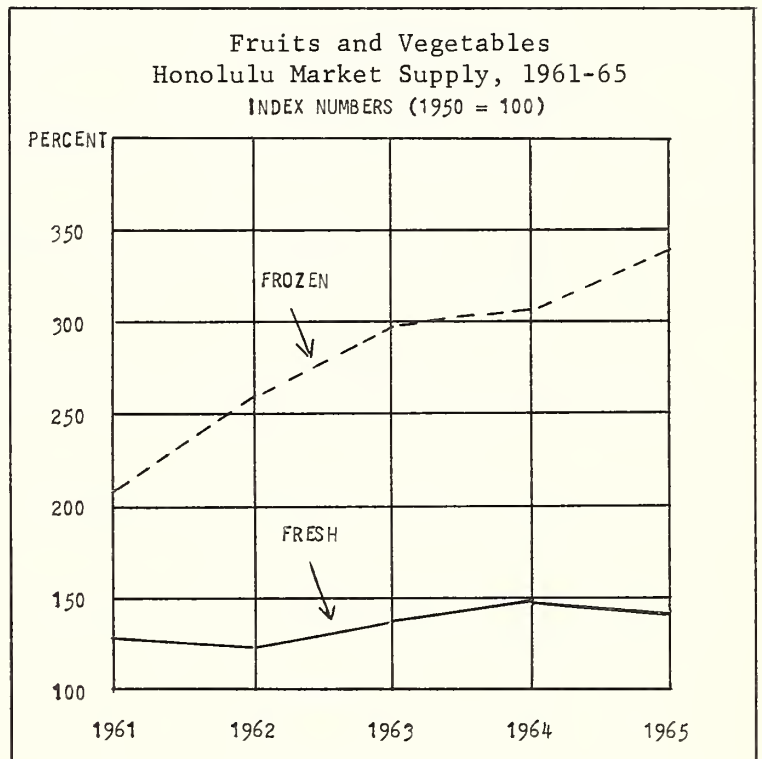

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

In 1965 the total market supply of fresh fruits and vegetables in Honolulu was 128.7 million pounds, a decrease of 6.3 million pounds or 4.7 percent from 1964. Foreign imports showed a slight increase; mainland imports recorded a slight decrease; while both Oahu and neighbor island production decreased over 3 million pounds each. The receipts of Oahu's producers were down 16.2 percent while outer island farmers dropped 7.4 percent from 1964.

Climatically, the first half of 1965 was about normal with little variation. During the latter half of the year, however, prolonged adverse weather was the determining factor for the drop in fresh fruits and vegetable marketings.

During the past five-year period, neighbor island farmers have gained appreciably in the portion of the state supply which they produce. In 1961, the neighbor island marketings were only 2.8 million pounds more than Oahu's marketings whereas, in 1965, the spread increased to 21.0 million pounds.

In 1965 inshipments of frozen fruits and vegetables totaled 4.1 million pounds, an increase of 414 thousand pounds, or 11.3 percent, over 1964. All of the imports, which increased each year during the 1961-65 period, were from the U. S. Mainland.

Selected Dairy Products and Oleomargarine

Fluid milk marketings in Honolulu amounted to 130.2 million pounds in 1965, an increase of 15.3 million pounds, or 13.3 percent, over 1964.

Imports of butter declined 19.0 percent from 1964, probably due to the increased use of cream instead of butter in ice cream. However, cheese and oleomargarine imports were above 1964 imports with cheese continuing its steady increase by 10.4 percent over 1964. Oleomargarine receipts showed a slight increase of 1.2 percent over 1964.

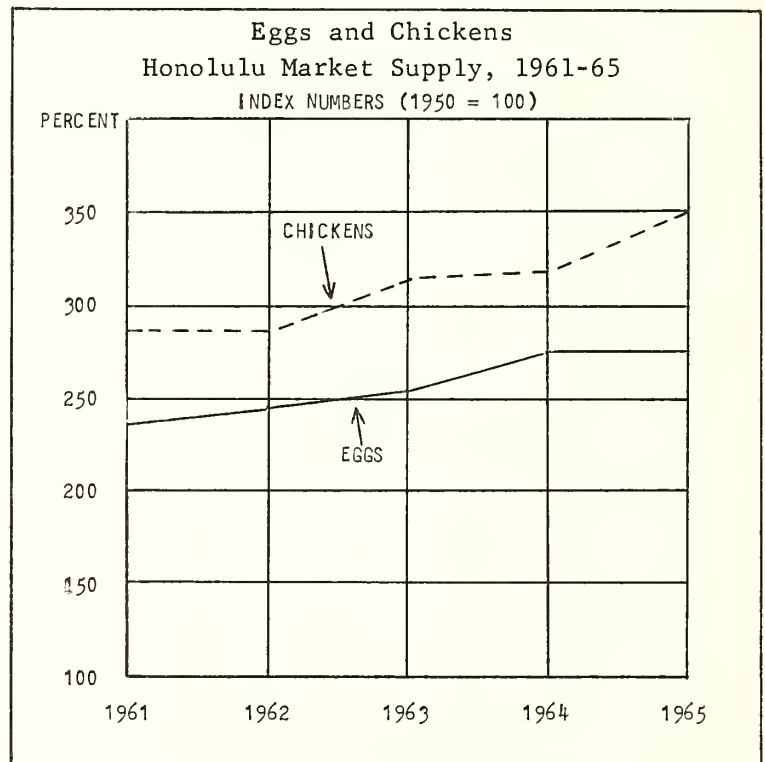

Poultry Products

Eggs: Although the 1965 total supply of fresh eggs in the Honolulu market increased only slightly over 1964, it continued the upward trend of the past five years. Total marketings in 1965 were 433.3 thousand cases (30 dozen to a case), an increase of .9 thousand cases over 1964.

Receipts from Oahu poultrymen continued on an upward trend. In 1965 Oahu's poultrymen produced 77.8 percent of the total supply; outer islands, 14.4 percent; and imports from the mainland accounted for 7.8 percent.

For the first time during the five-year period, neighbor island farmers failed to increase their marketings. During the year their marketings decreased 11,602 cases while Oahu's producers increased their output by 11,300 cases in 1965. Imports from the mainland increased 3.7 percent, or 1197 cases, over 1964.

Poultry Meats: Importers of mainland poultry meats continued to increase their share of the Honolulu market supply in 1965 by supplying 69.8 percent of the total. The total supply of poultry meats in 1965 was 12.4 million pounds, an increase of 1.3 million pounds, or 11.4 percent, over 1964. Inshipments increased 1.5 million pounds or 20.3 percent while state production decreased 0.2 million pounds, or 5.0 percent, from 1964.

Red Meats

In 1965 Honolulu market supply of fresh, chilled, and frozen red meats amounted to 69.5 million pounds, an increase of 3.7 million pounds, or 5.6 percent, above 1964.

Percentage-wise, imports from foreign countries led with a 9.4 percent increase over 1964; imports from the U. S. Mainland increased 5.9 percent; and state livestock farmers increased their marketings 2.5 percent.

Beef and veal constituted the largest volume of red meats with 72.4 percent; pork accounted for 26.3 percent; and lamb and mutton, the remainder, or 1.3 percent.

Beef and Veal: A total of 50.3 million pounds of beef and veal was marketed in Honolulu in 1965, an increase of 3.9 million pounds, or 8.5 percent, over 1964. Of this total only 33.7 percent, or 17.0 million pounds, was of state origin. This was the lowest percentage of the total supply during the five-year period, 1961-65.

The sources of supply contributing the most to the increase were imports from the U. S. Mainland, an increase of 16.9 percent; foreign sources were up 10.2 percent; Hawaii cattlemen's share, however, was up only 0.2 percent.

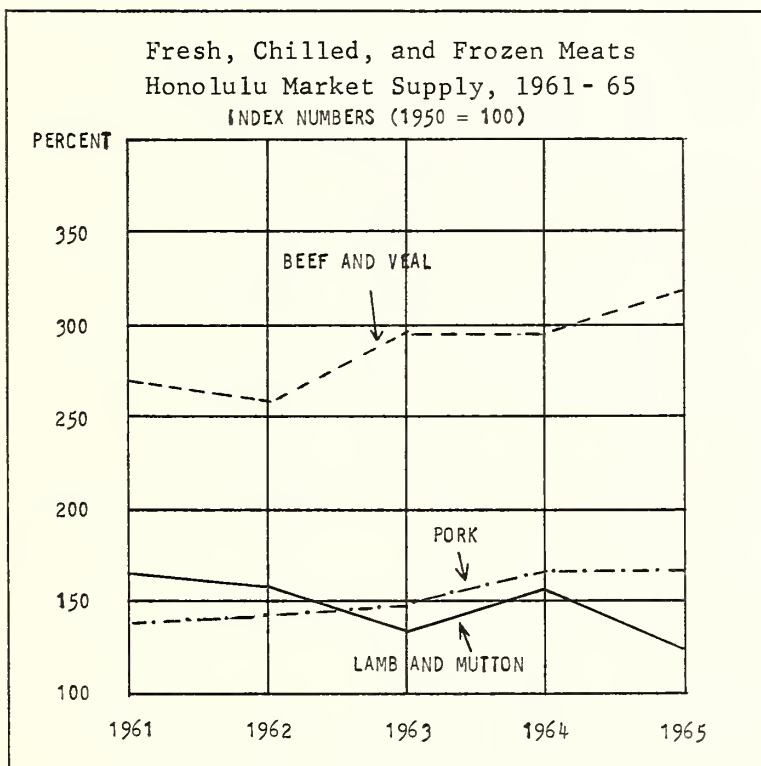

Of this 1965 supply of beef and veal, foreign sources led with 17.5 million pounds; state origin, 17.0 million pounds; and mainland origin, 15.8 million pounds.

Pork: The total Honolulu market supply of pork amounted to 18.3 million pounds in

1965. This was a slight decrease of 41 thousand pounds from the 1964 marketings of fresh, chilled, and frozen pork.

In 1965, imports of pork declined 4.7 percent but marketings of Island-produced pork increased 8.1 percent above 1964.

State hog raisers marketed nearly 7 million pounds of fresh and chilled pork in 1965 which represents the largest amount recorded during the five-year period. However, it constituted only 38.1 percent of the total supply.

Lamb and Mutton: The supply

of lamb and mutton in 1965 totaled

894 thousand pounds, a decrease of 237 thousand pounds, or 21.0 percent, from 1964. Of the total supply, 66.2 percent were from the U. S. Mainland, 29.1 percent from foreign countries and the remaining 4.7 percent from state production. Although constituting less than five percent of the total supply, the state marketings of 42 thousand pounds were the highest during the past five-year period.
